

# Isotoiture

## WHY INSULATE ?

EVEN IN THE CARIBBEAN INSULATION SHOULD BE A PRIORITY

Did you know that 60 % of the heat from a house comes from the roof structure?

'ISOTOITURE + ' has been the most frequently used roof insulation material for more than 25 years in GUADELOUPE !!! Today this new generation polystyrene, which is 100 % locally manufactured, is without doubt the benchmark product when it comes to thermal insulation in the West Indies.

## ISOTOITURE INSULATION

CK'ONE Distribution has selected for you the best roof insulation available on the market. We recommend the ISOTOITURE range that will give you the perfect insulation for your construction placed directly under the roof covering of your choice.

## 'PLUS-POINTS' OF THIS PRODUCT

CK'ONE DISTRIBUTION HAS CHOSEN CARAÏBES INDUSTRIE FOR PRODUCTS THAT OFFER:

**better insulation +**

**easier fitting +**

**greater economy +**

**greater pest resistance +**

**greater coolness +**

**greater water resistance +**

**greater comfort +**

**greater fire resistance !**

**Why does polystyrene offer excellent thermal insulation?**

It is a material that consists of closed cells filled with air: 1 m<sup>3</sup> of polystyrene is 98% air. That is why it is one of the most effective insulators.

**How can anyone be sure that a given material insulates?**

Two labels exist that denote the quality and performance of an insulator: The European CE marking and French ACERMI certification.

As part of its quality assurance programme, CARAIBES INDUSTRIE has obtained both these labels and undergoes monitoring and checks by the CSTB (Scientific and Technical Building Centre).

**' ISOTOITURE + ' TECHNICAL  
CHARACTERISTICS**

You will find below the characteristics of the insulator that we have selected :

# PRODUCT CERTIFICATION

You will find below the different certifications the product has attained

## DISTRIBUTOR PARTNERSHIP: 'AGIR PLUS' ENERGY SAVING INITIATIVE OF EDF

€1000 average\* 'AGIR PLUS' insulation premium from EDF for insulating with ISOTOITURE+ polystyrene

(The installation of this material by an 'AGIR PLUS' partner may result in financial aid from EDF (Electricité de France))  
For West Indies region \* **average for 125 m2**

With its **ACERMI\*** certification, the expanded polystyrene (EPS) manufactured by CARAIBES INDUSTRIE is the most suitable insulator for our part of the world.

\*ACERMI: Association for Certification of Insulating Materials, which guarantees the conformity of insulation products to harmonised European standards. EN 13162 to EN 13172.

These products meet RTAA DOM requirements (Thermal, Acoustic and Ventilation Regulations for French Overseas Departments) for residential buildings, help control energy consumption and reduce greenhouse gas emissions.

Caraïbes Industrie is very proud of this 'Produit Péyi' ('Local Product') that it has been manufacturing since 1991. This special label (Produit Péyi) denotes products where all the production processes are carried out in a French Overseas Department. In other words, opting for products stamped 'Produit Péyi' means you are CONSUMING GOODS PRODUCED LOCALLY! After use, EPS is 100% recyclable and reusable. Various outlets exist to give it a second life in any one of a variety of applications, in either expanded or extruded form. By choosing this material Caraïbes Industrie demonstrates its commitment to being **ECO-RESPONSIBLE**
